

IP-SAKTI SAHAYAK

INTERNATIONAL AYURVEDIC PATENT LAW DATA — WIPO

Detailed implementation dataset of the international and national legal measures listed by WIPO for patent disclosure issues involving genetic resources (GR) and/or traditional knowledge (TK). This is the international-law layer for Ayurvedic patent/IP-risk analysis.

Critical scope note: WIPO does not maintain a separate category called “Ayurvedic Patent Laws.” The relevant international legal layer is mainly patent disclosure, access-and-benefit-sharing, genetic-resource and traditional-knowledge law. These rules can become relevant when an Ayurvedic invention is based on a plant, biological resource, genetic resource, or associated traditional medicinal knowledge. WIPO's Disclosure Requirements Table is explicitly a non-exhaustive selection of legislative extracts and was last updated 10 January 2024.

WIPO coverage

The WIPO 2024 table identifies the following jurisdictions: Andean Community, European Union, and 33 individual countries. The detailed records below preserve that WIPO scope rather than inventing an Ayurveda-specific statute where none exists.

#	Jurisdiction	Main legal instrument	Core provision / topic	Ayurveda impl ementation relevance
1	Andean Community	Decision No. 391 of the Commission of the Andean Community — Common Regime on Access to Genetic Resources	Complementary Provisions; national IP offices	Indirect but important for Ayurvedic plant-based inventions: origin/access documentation can become an IP-gate when Andean genetic resources are involved.
2	Belgium	Code of Economic Law (updated 21 Apr 2022)	Article XI.16 §1(6)	Relevant to an Ayurvedic invention using biological/plant material when the material falls within the provision.
3	Brazil	Law No. 13.123 of 20 May 2015; Decree No. 8.772 of 11 May 2016	Article 47; implementing Decree Art. 80	High relevance for Ayurvedic products using Brazilian biological resources or associated TK.
4	Burundi	Law No. 1/13 of 28 July 2009 relating to Industrial Property in Burundi	Article 21; Article 406	Relevant to Ayurvedic botanical inventions using Burundi-origin resources/TK.
5	China	Patent Law of the People's Republic of China (2020 version in WIPO table); Implementing Rules	Article 26; Implementing Rules Article 26 / Rule 53	Relevant to Ayurvedic formulations/inventions based on plant genetic resources in China.

#	Jurisdiction	Main legal instrument	Core provision / topic	Ayurveda implementation relevance
6	Costa Rica	Law No. 7788 of 30 Apr 1998 on Biodiversity (amended up to Law No. 10133, 14 Mar 2022)	Article 80	Relevant where an Ayurvedic invention involves Costa Rican biodiversity.
7	Cuba	Decree-Law No. 290 of 20 Nov 2011 on Inventions and Industrial Designs and Models; Decree-Law No. 291 on Plant Varieties	Article 26.1(j)-(k) of Decree-Law 290; related plant-variety provisions	Relevant to Ayurvedic inventions using Cuban biological material.
8	Denmark	Order No. 2111 of 24 Nov 2021 on Patents and Supplementary Protection Certificates	Part I, Chapter 2, section 3(4)-(5)	Relevant to plant-derived Ayurvedic inventions where biological material is involved.
9	Djibouti	Law No. 50/AN/09/6th on the Protection of Industrial Property	Patent disclosure provision in WIPO extract	Relevant to Ayurvedic inventions based on local biological resources/TK.
10	Ecuador	Intellectual Property Law, Consolidation No. 2006-13; Organic Code on Social Economy of Knowledge, Creativity and Innovation (2016)	Article 282; Article 303; related access-contract provisions	Highly relevant to Ayurvedic inventions using Ecuadorian biodiversity or associated TK.
11	Egypt	Law No. 82 of 2002 on Protection of Intellectual Property Rights; Council of Ministers Resolution No. 1366 of 2003 implementing Regulations	Article 13; implementing Regulations, including Article 3	Especially relevant because WIPO expressly includes traditional medicinal knowledge in the scope.
12	Ethiopia	Access to Genetic Resources and Community Knowledge, and Community Rights Proclamation No. 482/2006	Relevant access-permit obligations, including clauses 12-14 in WIPO extract	Relevant to Ayurvedic inventions based on Ethiopian biological resources or community medicinal knowledge.
13	France	Act No. 2016-1087 of 8 Aug 2016 on Restoration of Biodiversity, Nature and Countryside	Article L.412-18-II and related provisions	Relevant to Ayurvedic botanical research/product development involving covered French resources/TK.

#	Jurisdiction	Main legal instrument	Core provision / topic	Ayurveda impl ementation relevance
14	Germany	Patent Act (WIPO table versions include amendments through 2021)	Section 34a; related Sections 6 and 32	Relevant to plant-based Ayurvedic inventions involving covered biological material.
15	India	Patents Act, 1970 (as amended up to Patents (Amendment) Act, 2005)	Section 10(4)(ii)(D); Section 64(1)(p)	This is the domestic baseline for the IP-SAKTI Ayurvedic/TK workflow; included here only because WIPO's international table includes it.
16	Indonesia	Law of the Republic of Indonesia No. 13 of 28 July 2016 on Patents	Article 26	Directly relevant to Ayurvedic inventions involving Indonesian genetic resources/TK.
17	Italy	Industrial Property Code (Legislative Decree No. 30 of 10 Feb 2005, amended up to Law No. 102 of 24 July 2023)	Article 170-bis; Article 170-ter; Article 173(7)	Relevant to Ayurvedic biotechnological/plant-derived inventions using covered material.
18	Iran	Regulations of the Law on Preservation and Utilization of Genetic Resources (2021), amended 2023	Articles 4, 15, 16, 67; related access provisions	Relevant to Ayurvedic plant/genetic-resource inventions involving Iran.
19	Kyrgyzstan	Law of the Kyrgyz Republic No. 116 of 31 July 2007 on Protection of Traditional Knowledge	Article 8	Highly relevant to Ayurvedic prior-art checking where traditional medicinal knowledge is involved.
20	Namibia	Industrial Property Act, 2012 (Act No. 1 of 2012), amended by Act No. 8 of 2016	Section 24(2); Section 65	Relevant to Ayurvedic inventions using Namibian biological resources or associated TK.
21	Norway	Patents Act (Act No. 9 of 15 Dec 1967), consolidated version cited by WIPO	Chapter 2, Section 8b	Relevant to Ayurvedic plant-derived inventions using biological material.

#	Jurisdiction	Main legal instrument	Core provision / topic	Ayurveda impl ementation relevance
22	Panama	Executive Decree No. 25 of 29 Apr 2009; Law No. 35 of 10 May 1996 on Industrial Property	Executive Decree Art. 19(g); patent-law provisions	Relevant to Ayurvedic inventions using Panamanian biological resources/TK.
23	Peru	Law No. 27811 of 24 July 2002 on Collective Knowledge of Indigenous Peoples derived from Biological Resources; Decision No. 486	Complementary Provision Second; related Decision 486 provisions	Highly relevant to Ayurvedic medicinal knowledge if a Peruvian indigenous collective-knowledge source is involved.
24	Philippines	Philippine Technology Transfer Act of 2009 (Republic Act No. 10055) and Implementing Regulations (Joint Administrative Order No. 02-2010)	Article III, Section 8(c); related implementing provisions	Relevant to Ayurvedic/ethnomedicinal research funded under the Philippine public R&D framework.
25	Romania	Implementing Regulations of Patent Law No. 64/1991	WIPO-listed patent application provisions	Relevant to Ayurvedic inventions involving covered TK/biological material.
26	Samoa	Intellectual Property Act 2011, amended by Property Amendment Act 2018	Article 7(3)(g)-(h), Article 7(10), Article 17; also innovation-patent provisions	Relevant to Ayurvedic-style traditional medicinal knowledge where a local/indigenous knowledge source is involved.
27	South Africa	Patents Amendment Act 2005 (Act No. 20 of 2005)	Section 2 definitions; Section 3A and related patent provisions	Relevant to Ayurvedic/ethnobotanical inventions using South African biological resources or indigenous TK.
28	Spain	Patents Act No. 24/2015 of 24 July 2015, amended by Act No. 6/2018	Article 23(2)	Relevant to plant-based Ayurvedic inventions involving covered biological material.

#	Jurisdiction	Main legal instrument	Core provision / topic	Ayurveda impl ementation relevance
29	Sweden	Regulation (2004:162) Amending the Patents Decree	Article 5a	Relevant to Ayurvedic plant-derived inventions involving covered biological material.
30	Switzerland	Federal Act of 25 June 1954 on Patents for Inventions (version cited by WIPO)	Article 49a; Article 59a; Article 81a	Highly relevant to Ayurvedic plant/TK inventions where Swiss patent protection is sought.
31	Uganda	Industrial Property Act, 2014	Section 21(8)	Relevant to Ayurvedic/ethno medicinal inventions based on Ugandan resources/TK.
32	Vanuatu	Patents Act No. 2 of 2003	Part 12, Section 47	Highly relevant as a benefit-sharing/consent model for traditional medicinal knowledge.
33	Viet Nam	Circular No. 01/2007/TT-BKHCN of 14 Feb 2007 implementing Decree No. 103/2006/ND-CP under the Law on Intellectual Property	Article 23.11	Relevant to Ayurvedic plant /genetic-resource inventions involving Vietnamese resources/TK.
34	Zambia	Patents Act, 2016 (Act No. 40 of 2016)	Section 28; related examination provisions	Relevant to Ayurvedic inventions using Zambian biological resources or associated TK.

01. Andean Community

WIPO international patent/TK disclosure-law record

Legal instrument / law	Decision No. 391 of the Commission of the Andean Community — Common Regime on Access to Genetic Resources
Exact provision / legal anchor	Complementary Provisions; national IP offices
Subject matter covered	Genetic resources; associated intangible/TK components
Trigger — when the rule becomes relevant	When the invention/product/process for which protection is sought is based on genetic resources or derivatives originating in a Member Country.
What the applicant must disclose / provide	IP offices require the access-contract registration number and a copy where there is certainty/reasonable indication of relevant genetic-resource origin.
Consequence / legal effect	Non-compliant access can prevent recognition of IP rights; affected Member Country may seek nullification/action in countries granting rights.
Ayurvedic implementation relevance	Indirect but important for Ayurvedic plant-based inventions: origin/access documentation can become an IP-gate when Andean genetic resources are involved.
Verification / source status	WIPO regional entry; source extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

02. Belgium

WIPO international patent/TK disclosure-law record

Legal instrument / law	Code of Economic Law (updated 21 Apr 2022)
Exact provision / legal anchor	Article XI.16 §1(6)
Subject matter covered	Biological material of plant or animal origin
Trigger — when the rule becomes relevant	Where an invention is developed from biological material of plant or animal origin and its geographical origin is known.
What the applicant must disclose / provide	Patent application contains a statement of the geographical origin of the biological material, where known.
Consequence / legal effect	WIPO extract records the disclosure obligation; the table identifies this as a patent-law disclosure measure.
Ayurvedic implementation relevance	Relevant to an Ayurvedic invention using biological/plant material when the material falls within the provision.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

03. Brazil

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law No. 13.123 of 20 May 2015; Decree No. 8.772 of 11 May 2016
Exact provision / legal anchor	Article 47; implementing Decree Art. 80
Subject matter covered	Genetic heritage and associated traditional knowledge
Trigger — when the rule becomes relevant	IP rights relating to a finished product/reproductive material obtained through access to genetic heritage or associated TK.
What the applicant must disclose / provide	Registration/authorization under the biodiversity access-and-benefit-sharing regime is required before the relevant IP right is granted; the implementing rules also address requests for IP rights in Brazil or abroad without prior registration.
Consequence / legal effect	Fines under the implementing Decree for requesting IP rights without prior registration; amounts vary by violator category.
Ayurvedic implementation relevance	High relevance for Ayurvedic products using Brazilian biological resources or associated TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

04. Burundi

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law No. 1/13 of 28 July 2009 relating to Industrial Property in Burundi
Exact provision / legal anchor	Article 21; Article 406
Subject matter covered	Genetic/biological resources; traditional knowledge
Trigger — when the rule becomes relevant	When genetic/biological resources collected in Burundi or protected TK are used directly or indirectly in making the claimed invention.
What the applicant must disclose / provide	Description must clearly indicate origin of the genetic/biological resources and relevant protected TK; source/consent-related information is addressed by the provision.
Consequence / legal effect	Competent authority may claim ownership of a patent application/patent not complying with Article 21 in the circumstances specified.
Ayurvedic implementation relevance	Relevant to Ayurvedic botanical inventions using Burundi-origin resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

05. China

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patent Law of the People's Republic of China (2020 version in WIPO table); Implementing Rules
Exact provision / legal anchor	Article 26; Implementing Rules Article 26 / Rule 53
Subject matter covered	Genetic resources
Trigger — when the rule becomes relevant	When an invention-creation is accomplished by relying on genetic resources.
What the applicant must disclose / provide	Applicant must indicate the direct and original source of the genetic resources; if the original source cannot be indicated, reasons must be stated.
Consequence / legal effect	WIPO extract links non-compliance with Article 26 to substantive examination/rejection provisions; unlawful acquisition/utilization can also bar patent grant under Article 5.
Ayurvedic implementation relevance	Relevant to Ayurvedic formulations/inventions based on plant genetic resources in China.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

06. Costa Rica

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law No. 7788 of 30 Apr 1998 on Biodiversity (amended up to Law No. 10133, 14 Mar 2022)
Exact provision / legal anchor	Article 80
Subject matter covered	Components of biodiversity
Trigger — when the rule becomes relevant	Before protection is granted for innovations involving components of biodiversity.
What the applicant must disclose / provide	IP/industrial property registers must consult the Technical Office and provide the certificate of origin and prior informed consent.
Consequence / legal effect	Reasoned opposition by the Technical Office is sufficient to refuse patent/innovation protection.
Ayurvedic implementation relevance	Relevant where an Ayurvedic invention involves Costa Rican biodiversity.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

07. Cuba

WIPO international patent/TK disclosure-law record

Legal instrument / law	Decree-Law No. 290 of 20 Nov 2011 on Inventions and Industrial Designs and Models; Decree-Law No. 291 on Plant Varieties
Exact provision / legal anchor	Article 26.1(j)-(k) of Decree-Law 290; related plant-variety provisions
Subject matter covered	Biological material; genetic material; plant varieties/TK
Trigger — when the rule becomes relevant	Where an invention concerns biological material, including genetic material and derivatives, for which Cuba is the country of origin or which is present as a domesticated/cultivated species in Cuba.
What the applicant must disclose / provide	Application includes prior express authorization to access biological material and a declaration concerning the material as specified by the law.
Consequence / legal effect	WIPO table identifies consequences of non-compliance, including treatment under the applicable patent/plant-variety regime.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions using Cuban biological material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

08. Denmark

WIPO international patent/TK disclosure-law record

Legal instrument / law	Order No. 2111 of 24 Nov 2021 on Patents and Supplementary Protection Certificates
Exact provision / legal anchor	Part I, Chapter 2, section 3(4)-(5)
Subject matter covered	Biological material
Trigger — when the rule becomes relevant	When an invention relates to or makes use of biological material.
What the applicant must disclose / provide	Application must contain the information concerning the biological material/geographical origin required by the provision; where origin is unknown, the prescribed statement is used.
Consequence / legal effect	WIPO table identifies non-compliance consequences in the patent framework; the precise effect depends on the applicable provision.
Ayurvedic implementation relevance	Relevant to plant-derived Ayurvedic inventions where biological material is involved.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

09. Djibouti

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law No. 50/AN/09/6th on the Protection of Industrial Property
Exact provision / legal anchor	Patent disclosure provision in WIPO extract
Subject matter covered	Genetic resources; traditional knowledge
Trigger — when the rule becomes relevant	When a patent application involves the genetic/biological resources or TK covered by the law.
What the applicant must disclose / provide	WIPO's extract requires disclosure of the relevant source/origin information as prescribed by the industrial-property framework.
Consequence / legal effect	WIPO records the disclosure requirement; detailed sanction language should be retrieved from the current WIPO Lex text before a legal conclusion.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions based on local biological resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

10. Ecuador

WIPO international patent/TK disclosure-law record

Legal instrument / law	Intellectual Property Law, Consolidation No. 2006-13; Organic Code on Social Economy of Knowledge, Creativity and Innovation (2016)
Exact provision / legal anchor	Article 282; Article 303; related access-contract provisions
Subject matter covered	Genetic resources; associated traditional knowledge
Trigger — when the rule becomes relevant	Where products/processes seeking protection have been obtained/developed from genetic resources or associated TK, including Ecuador-origin resources/TK.
What the applicant must disclose / provide	Access-contract registration number/copy and, where applicable, license/authorization to use community TK are required in the circumstances set out by the law.
Consequence / legal effect	Patent invalidity can follow where required access-contract or TK authorization documents are absent; invalidity may operate from the filing date.
Ayurvedic implementation relevance	Highly relevant to Ayurvedic inventions using Ecuadorian biodiversity or associated TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

11. Egypt

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law No. 82 of 2002 on Protection of Intellectual Property Rights; Council of Ministers Resolution No. 1366 of 2003 implementing Regulations
Exact provision / legal anchor	Article 13; implementing Regulations, including Article 3
Subject matter covered	Biological/plant/animal products; traditional medicinal knowledge and other heritage
Trigger — when the rule becomes relevant	When an invention/utility model involves biological material or traditional medicinal knowledge/heritage.
What the applicant must disclose / provide	Documentation must prove the inventor accessed the source/material legitimately under Egyptian law; the Regulations allow the documentation within four months from filing in the cited provision.
Consequence / legal effect	If required documents are not furnished in time, the application is treated as non-existent under the cited Regulations.
Ayurvedic implementation relevance	Especially relevant because WIPO expressly includes traditional medicinal knowledge in the scope.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

12. Ethiopia

WIPO international patent/TK disclosure-law record

Legal instrument / law	Access to Genetic Resources and Community Knowledge, and Community Rights Proclamation No. 482/2006
Exact provision / legal anchor	Relevant access-permit obligations, including clauses 12–14 in WIPO extract
Subject matter covered	Genetic resources; community knowledge
Trigger — when the rule becomes relevant	When an access permit is involved and the user seeks IP protection over accessed genetic resources/community knowledge.
What the applicant must disclose / provide	Applicant/user must negotiate the required agreement, obtain explicit written consent for protected community knowledge, and recognize the locality of origin in the application for commercial property protection.
Consequence / legal effect	Non-compliant access/use can prevent lawful IP protection and trigger measures under the proclamation.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions based on Ethiopian biological resources or community medicinal knowledge.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

13. France

WIPO international patent/TK disclosure-law record

Legal instrument / law	Act No. 2016-1087 of 8 Aug 2016 on Restoration of Biodiversity, Nature and Countryside
Exact provision / legal anchor	Article L.412-18-II and related provisions
Subject matter covered	Genetic resources and associated traditional knowledge
Trigger — when the rule becomes relevant	Use of genetic resources/associated TK falling within the access-and-benefit-sharing framework, including activities subject to the French regime.
What the applicant must disclose / provide	Information required by the competent authority must be made available; the regime also addresses declarations/monitoring connected with use and compliance.
Consequence / legal effect	Consequences depend on the relevant access/benefit-sharing provisions; the WIPO table records the regime as including disclosure-related requirements.
Ayurvedic implementation relevance	Relevant to Ayurvedic botanical research/product development involving covered French resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

14. Germany

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patent Act (WIPO table versions include amendments through 2021)
Exact provision / legal anchor	Section 34a; related Sections 6 and 32
Subject matter covered	Biological material of plant or animal origin
Trigger — when the rule becomes relevant	Where an invention is based on or uses biological material of plant or animal origin.
What the applicant must disclose / provide	Patent application should include geographical origin information if known; the patent office may notify the competent authority in the circumstances specified.
Consequence / legal effect	WIPO extract identifies procedural consequences and links the regime to Nagoya Protocol implementation; lack of origin information does not by itself necessarily invalidate the patent under the cited provision.
Ayurvedic implementation relevance	Relevant to plant-based Ayurvedic inventions involving covered biological material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

15. India

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patents Act, 1970 (as amended up to Patents (Amendment) Act, 2005)
Exact provision / legal anchor	Section 10(4)(ii)(D); Section 64(1)(p)
Subject matter covered	Biological material
Trigger — when the rule becomes relevant	When biological material is used in an invention and the relevant disclosure condition applies.
What the applicant must disclose / provide	Specification must disclose source and geographical origin of biological material used in the invention.
Consequence / legal effect	WIPO extract identifies revocation where the complete specification does not disclose or wrongly mentions the source/geographical origin.
Ayurvedic implementation relevance	This is the domestic baseline for the IP-SAKTI Ayurvedic/TK workflow; included here only because WIPO's international table includes it.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

16. Indonesia

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law of the Republic of Indonesia No. 13 of 28 July 2016 on Patents
Exact provision / legal anchor	Article 26
Subject matter covered	Genetic resources and/or traditional knowledge
Trigger — when the rule becomes relevant	When an invention is associated with and/or derived from a genetic resource and/or traditional knowledge.
What the applicant must disclose / provide	Origin of the genetic resource and/or TK must be disclosed clearly and truthfully in the patent description; the information is endorsed by a competent government-authorized authority; access/benefit sharing follows national/international law.
Consequence / legal effect	The cited provision creates a mandatory disclosure framework; implementation consequences should be checked against the current Indonesian law/rules before legal reliance.
Ayurvedic implementation relevance	Directly relevant to Ayurvedic inventions involving Indonesian genetic resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

17. Italy

WIPO international patent/TK disclosure-law record

Legal instrument / law	Industrial Property Code (Legislative Decree No. 30 of 10 Feb 2005, amended up to Law No. 102 of 24 July 2023)
Exact provision / legal anchor	Article 170-bis; Article 170-ter; Article 173(7)
Subject matter covered	Biological material of animal or plant origin
Trigger — when the rule becomes relevant	For biotechnological inventions based on biological material of animal/plant origin.
What the applicant must disclose / provide	Provenance of the biological material is to be declared with the patent application; the cited provisions address origin and related declarations.
Consequence / legal effect	Failure to file required declarations can lead to rejection after the applicant is given the procedural opportunity to respond; false origin certification can attract an administrative fine of €10,000–€100,000.
Ayurvedic implementation relevance	Relevant to Ayurvedic biotechnological/plant-derived inventions using covered material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

18. Iran

WIPO international patent/TK disclosure-law record

Legal instrument / law	Regulations of the Law on Preservation and Utilization of Genetic Resources (2021), amended 2023
Exact provision / legal anchor	Articles 4, 15, 16, 67; related access provisions
Subject matter covered	Genetic/biological resources and biotechnology
Trigger — when the rule becomes relevant	When an invention relates to biotechnology/genetic resources or uses covered biological resources.
What the applicant must disclose / provide	Declarations may include geographical origin, manner of access, place of preservation where origin is unknown, and certification of deposited samples where the patent office considers description impossible.
Consequence / legal effect	WIPO extract states false information/non-compliance with access laws can result in patent invalidation; unauthorized access/export can also lead to penalties.
Ayurvedic implementation relevance	Relevant to Ayurvedic plant/genetic-resource inventions involving Iran.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

19. Kyrgyzstan

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law of the Kyrgyz Republic No. 116 of 31 July 2007 on Protection of Traditional Knowledge
Exact provision / legal anchor	Article 8
Subject matter covered	Traditional knowledge used as prior art/prototype
Trigger — when the rule becomes relevant	When patenting subject matter created on the base of traditional knowledge.
What the applicant must disclose / provide	Application materials must reveal the origin of TK used as prior art/prototype and indicate the source through which the TK was made available to the public.
Consequence / legal effect	The WIPO table records the disclosure rule; legal effect depends on the wider TK/patent framework.
Ayurvedic implementation relevance	Highly relevant to Ayurvedic prior-art checking where traditional medicinal knowledge is involved.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

20. Namibia

WIPO international patent/TK disclosure-law record

Legal instrument / law	Industrial Property Act, 2012 (Act No. 1 of 2012), amended by Act No. 8 of 2016
Exact provision / legal anchor	Section 24(2); Section 65
Subject matter covered	Biological resources; associated indigenous/traditional knowledge
Trigger — when the rule becomes relevant	Where the patent subject matter is derived from or developed with biological resources or associated indigenous/traditional knowledge.
What the applicant must disclose / provide	Applicant must disclose providing country, the person/source from whom obtained, country of origin after reasonable inquiry, and other prescribed source/nature information.
Consequence / legal effect	Patent may be invalidated where statutory requirements are not complied with, subject to the Act's provisions.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions using Namibian biological resources or associated TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

21. Norway

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patents Act (Act No. 9 of 15 Dec 1967), consolidated version cited by WIPO
Exact provision / legal anchor	Chapter 2, Section 8b
Subject matter covered	Biological material
Trigger — when the rule becomes relevant	Where an invention concerns or uses biological material.
What the applicant must disclose / provide	Patent application must provide information on the providing country and country of origin for biological material in accordance with Section 8b; WIPO also notes treatment where origin is unknown.
Consequence / legal effect	WIPO table records patent-law consequences and exceptions; absence of origin information does not necessarily affect validity in the circumstances stated.
Ayurvedic implementation relevance	Relevant to Ayurvedic plant-derived inventions using biological material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

22. Panama

WIPO international patent/TK disclosure-law record

Legal instrument / law	Executive Decree No. 25 of 29 Apr 2009; Law No. 35 of 10 May 1996 on Industrial Property
Exact provision / legal anchor	Executive Decree Art. 19(g); patent-law provisions
Subject matter covered	Genetic resources; traditional knowledge
Trigger — when the rule becomes relevant	Where an invention uses genetic/biological material or relevant traditional knowledge under Panama's access regime.
What the applicant must disclose / provide	Access contracts include an obligation to present certification of origin/provenance of genetic/biological material used in patent applications submitted in Panama and/or relevant WIPO-member patent offices.
Consequence / legal effect	Consequences depend on the access/industrial-property framework; the WIPO entry is primarily a disclosure/certification requirement.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions using Panamanian biological resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

23. Peru

WIPO international patent/TK disclosure-law record

Legal instrument / law	Law No. 27811 of 24 July 2002 on Collective Knowledge of Indigenous Peoples derived from Biological Resources; Decision No. 486
Exact provision / legal anchor	Complementary Provision Second; related Decision 486 provisions
Subject matter covered	Collective indigenous knowledge
Trigger — when the rule becomes relevant	When goods/processes are produced or developed on the basis of protected collective knowledge.
What the applicant must disclose / provide	Applicant must submit a copy of the license contract as a prior requirement for the grant of the relevant IP right.
Consequence / legal effect	Failure to meet the applicable collective-knowledge/access requirements can affect entitlement to the IP right under the regime.
Ayurvedic implementation relevance	Highly relevant to Ayurvedic medicinal knowledge if a Peruvian indigenous collective-knowledge source is involved.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

24. Philippines

WIPO international patent/TK disclosure-law record

Legal instrument / law	Philippine Technology Transfer Act of 2009 (Republic Act No. 10055) and Implementing Regulations (Joint Administrative Order No. 02-2010)
Exact provision / legal anchor	Article III, Section 8(c); related implementing provisions
Subject matter covered	Biodiversity, genetic resources, traditional/indigenous knowledge systems and practices
Trigger — when the rule becomes relevant	For R&D/IP arising from publicly funded research and involving biodiversity, genetic resources or associated TK/IKSP.
What the applicant must disclose / provide	IP applications by covered research/development institutions must disclose biodiversity/genetic-resource/TK/IKSP utilized in or forming the basis of the subject matter.
Consequence / legal effect	WIPO table states that non-compliance can be a cause of refusal or invalidation in the relevant patent context.
Ayurvedic implementation relevance	Relevant to Ayurvedic/ethnomedicinal research funded under the Philippine public R&D framework.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

25. Romania

WIPO international patent/TK disclosure-law record

Legal instrument / law	Implementing Regulations of Patent Law No. 64/1991
Exact provision / legal anchor	WIPO-listed patent application provisions
Subject matter covered	Traditional knowledge / biological material as covered by the Romanian rules
Trigger — when the rule becomes relevant	Where the patent application involves the covered traditional knowledge/biological-resource circumstances.
What the applicant must disclose / provide	Application disclosure includes the source/origin information required by the implementing rules.
Consequence / legal effect	WIPO lists content and trigger of disclosure; the exact legal effect should be checked against the current consolidated Romanian text before legal reliance.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions involving covered TK/biological material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

26. Samoa

WIPO international patent/TK disclosure-law record

Legal instrument / law	Intellectual Property Act 2011, amended by Property Amendment Act 2018
Exact provision / legal anchor	Article 7(3)(g)-(h), Article 7(10), Article 17; also innovation-patent provisions
Subject matter covered	Biological material; local/indigenous community knowledge
Trigger — when the rule becomes relevant	Where the invention is based on/derived from biological material or knowledge available within a local/indigenous community.
What the applicant must disclose / provide	Application states whether the invention is based on such knowledge and discloses the source and geographical origin of biological material; Registrar may require evidence of title/authority.
Consequence / legal effect	Failure to provide directed evidence may cause the Registrar to cease dealing with the application; patent invalidation provisions also apply to non-compliance with specified requirements.
Ayurvedic implementation relevance	Relevant to Ayurvedic-style traditional medicinal knowledge where a local/indigenous knowledge source is involved.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

27. South Africa

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patents Amendment Act 2005 (Act No. 20 of 2005)
Exact provision / legal anchor	Section 2 definitions; Section 3A and related patent provisions
Subject matter covered	Genetic resources; indigenous biological resources; traditional knowledge
Trigger — when the rule becomes relevant	Where the invention is based on or derived from indigenous biological/genetic resources or traditional knowledge.
What the applicant must disclose / provide	Application must provide the prescribed disclosure/authority information and address the applicant's title/authority to use covered resources/TK.
Consequence / legal effect	WIPO identifies patent consequences for non-compliance, including effects on grant/validity in the applicable statutory framework.
Ayurvedic implementation relevance	Relevant to Ayurvedic/ethnobotanical inventions using South African biological resources or indigenous TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

28. Spain

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patents Act No. 24/2015 of 24 July 2015, amended by Act No. 6/2018
Exact provision / legal anchor	Article 23(2)
Subject matter covered	Biological material
Trigger — when the rule becomes relevant	Where an invention involves biological material in the circumstances covered by Article 23.
What the applicant must disclose / provide	Patent application contains information concerning the geographical origin of biological material where applicable.
Consequence / legal effect	WIPO table identifies the rule as a content-of-disclosure requirement; exact sanctions should be checked against the current Spanish consolidated law.
Ayurvedic implementation relevance	Relevant to plant-based Ayurvedic inventions involving covered biological material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

29. Sweden

WIPO international patent/TK disclosure-law record

Legal instrument / law	Regulation (2004:162) Amending the Patents Decree
Exact provision / legal anchor	Article 5a
Subject matter covered	Biological material of plant or animal origin
Trigger — when the rule becomes relevant	Where an invention concerns or uses biological material of plant or animal origin.
What the applicant must disclose / provide	Application includes information on geographical origin if known; if origin is not known, that must be indicated.
Consequence / legal effect	WIPO states that lack of information on geographical origin or applicant knowledge is without prejudice to patent processing/validity in the cited rule.
Ayurvedic implementation relevance	Relevant to Ayurvedic plant-derived inventions involving covered biological material.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

30. Switzerland

WIPO international patent/TK disclosure-law record

Legal instrument / law	Federal Act of 25 June 1954 on Patents for Inventions (version cited by WIPO)
Exact provision / legal anchor	Article 49a; Article 59a; Article 81a
Subject matter covered	Genetic resources; traditional knowledge of indigenous/local communities
Trigger — when the rule becomes relevant	Where an invention is directly based on covered genetic resources or traditional knowledge.
What the applicant must disclose / provide	Patent application must contain information on the source of the genetic resource or TK; if source is unknown, applicant must confirm this in writing.
Consequence / legal effect	Patent Institute gives a period to remedy deficiencies; unresolved deficiencies can lead to rejection. Wilful false information under Article 49a can attract a fine up to CHF 100,000.
Ayurvedic implementation relevance	Highly relevant to Ayurvedic plant/TK inventions where Swiss patent protection is sought.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

31. Uganda

WIPO international patent/TK disclosure-law record

Legal instrument / law	Industrial Property Act, 2014
Exact provision / legal anchor	Section 21(8)
Subject matter covered	Biological resources; traditional knowledge
Trigger — when the rule becomes relevant	Where biological/genetic resources collected in Uganda or TK are directly/indirectly used in making the invention.
What the applicant must disclose / provide	Description must clearly identify origin of genetic/biological resources and relevant traditional knowledge.
Consequence / legal effect	WIPO extract records the disclosure requirement and patent-law consequences for non-compliance.
Ayurvedic implementation relevance	Relevant to Ayurvedic/ethnomedicinal inventions based on Ugandan resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

32. Vanuatu

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patents Act No. 2 of 2003
Exact provision / legal anchor	Part 12, Section 47
Subject matter covered	Indigenous knowledge
Trigger — when the rule becomes relevant	When a patent application is based on, arose out of, or incorporates elements of indigenous knowledge.
What the applicant must disclose / provide	Registrar must refer the application to the National Council of Chiefs. Grant requires prior informed consent of custom owners and an agreement for an equitable share of benefits; special procedure applies if owners cannot be identified or ownership is disputed.
Consequence / legal effect	If no benefit-sharing agreement is reached within 12 months, Registrar may grant and determine the equitable payment payable to custom owners/Council.
Ayurvedic implementation relevance	Highly relevant as a benefit-sharing/consent model for traditional medicinal knowledge.
Verification / source status	WIPO Lex / WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

33. Viet Nam

WIPO international patent/TK disclosure-law record

Legal instrument / law	Circular No. 01/2007/TT-BKHCN of 14 Feb 2007 implementing Decree No. 103/2006/ND-CP under the Law on Intellectual Property
Exact provision / legal anchor	Article 23.11
Subject matter covered	Gene source and/or traditional knowledge
Trigger — when the rule becomes relevant	Where patent subject matter uses gene sources and/or traditional knowledge as covered by the rule.
What the applicant must disclose / provide	Application includes the prescribed information about the gene source/TK and its origin/source.
Consequence / legal effect	WIPO lists the disclosure requirement in the patent application framework; exact current enforcement should be checked against the latest Vietnamese text.
Ayurvedic implementation relevance	Relevant to Ayurvedic plant/genetic-resource inventions involving Vietnamese resources/TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

34. Zambia

WIPO international patent/TK disclosure-law record

Legal instrument / law	Patents Act, 2016 (Act No. 40 of 2016)
Exact provision / legal anchor	Section 28; related examination provisions
Subject matter covered	Genetic resources; associated traditional knowledge
Trigger — when the rule becomes relevant	Where a patent application involves an invention utilizing genetic resources or associated TK, or both.
What the applicant must disclose / provide	Applicant must disclose country of origin of the genetic resources/associated TK and the source in the country providing them.
Consequence / legal effect	Non-compliance can affect examination/validity under the Act; WIPO's extract connects the disclosure requirement with examination provisions.
Ayurvedic implementation relevance	Relevant to Ayurvedic inventions using Zambian biological resources or associated TK.
Verification / source status	WIPO-listed extract

Database interpretation: Store this record as a jurisdiction-level legal rule. Do not convert it into a claim that an Ayurvedic patent will automatically be rejected. The system should first determine whether the user's invention actually uses the covered biological/genetic resource or traditional knowledge and then retrieve the relevant national provision.

WIPO GRATK TREATY — INTERNATIONAL STANDARD TO TRACK

WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge (adopted 24 May 2024)

This treaty is not an Ayurveda-only treaty. It is directly relevant to Ayurvedic inventions when claimed inventions are based on genetic resources and/or associated traditional knowledge.

Mandatory patent disclosure	Applicants must disclose the country of origin of the genetic resources and/or the Indigenous Peoples or local community providing the associated TK when the claimed invention is “based on” genetic resources and/or associated TK. If unknown, the source should be disclosed; if none of the required information is known, the applicant must declare that.
Patent-office role	Patent offices should provide certain guidance, but are not obliged by the treaty to verify the authenticity of the disclosure.
Sanctions and remedies	Failure to disclose is subject to appropriate, effective and proportionate measures. Applicants should have an opportunity to rectify failures unless fraudulent conduct/intent is involved. Where there is fraudulent intent, post-grant sanctions/remedies may be provided.
Patent validity safeguard	Except in cases involving fraud as addressed by the treaty, a Party should not revoke, invalidate or render unenforceable a patent solely because the required disclosure was not made.
Information systems	The treaty encourages information systems/databases for genetic resources and associated TK, accessible to patent offices for search and examination, taking national circumstances into account.
Non-retroactivity	Treaty obligations are not imposed on patent applications filed before the treaty enters into force, subject to existing national disclosure laws.
Implementation for IP-SAKTI	Track this as a separate international-rule layer. For an Ayurvedic user seeking protection abroad, the system should ask whether the invention is based on a biological/genetic resource or associated traditional knowledge and, where relevant, surface origin/source disclosure requirements.

Source authority: WIPO, “Disclosure Requirements Table related to genetic resources and/or traditional knowledge,” updated 10 January 2024; WIPO Traditional Knowledge / Genetic Resources database; and WIPO Treaty on Intellectual Property, Genetic Resources and Associated Traditional Knowledge (adopted 24 May 2024).

READY-TO-IMPLEMENT DATABASE SCHEMA

Recommended JSON/database fields for the international-law layer of IP-SAKTI.

Field	Type	Purpose
jurisdiction_id	string	Stable ID such as WIPO-GR-TK-BE.
jurisdiction	string	Country or regional jurisdiction.
jurisdiction_type	enum	country / regional_organization.
legal_instrument	string	Official law/regulation/instrument title as listed by WIPO.
provision	string	Article/section/rule cited by WIPO.
subject_matter	array	genetic_resources / traditional_knowledge / associated TK.
trigger	text	When disclosure/access/consent rule becomes relevant.
required_disclosure	text	Information/documents the applicant must provide.
consequence	text	Rejection, invalidation, consent/benefit-sharing condition, fine, etc.
ayurvedic_relevance	text	How the rule can affect plant-based Ayurvedic invention workflows.
source_authority	string	WIPO.
source_document	string	WIPO Disclosure Requirements Table.
source_url	string	Official WIPO source URL.
verification_date	date	Date your team last re-checks the official WIPO source.
legal_status	enum	WIPO-listed historical extract / current-law verification required.
notes	text	Do not treat as legal advice; escalate uncertain cases.
