5. WHAT TO INDEX FOR AN AYURVEDA-IP KNOWLEDGE BASE

Patent authorities • trademark registries • WIPO/PCT • TKDL • Ayurveda/traditional-knowledge guidance • medicinal-plant/biodiversity authorities • patent-search databases • trademark-search databases • patent/trademark classification systems.

Important: TKDL is particularly relevant to Ayurveda because it documents codified Indian traditional medicine knowledge and can support prior-art searching. IP India also publishes examination guidance specifically addressing AYUSH-related inventions and traditional knowledge/biological material.
