

IP-SAKTI SAHAYAK

Family 2 — Meliaceae / Neem

Objective: TKDL-only family cluster for the proposed feature: identify related TKDL-listed plants and rank them as potential alternatives for further research when a user encounters relevant IP/prior-art risk. This is not legal clearance.

Source rule: All plant entries below are verified in the official TKDL plant-name index. Specific use/formulation/IP claims are included only where supported by a public TKDL examination/outcome record reviewed.

Anchor: Neem — *Azadirachta indica* A. Juss. TKDL names include Nimba / Neem and regional names including Vembu, Arittam, Nimbam, Paripathiram, Pisumantham and Vepachetta.

1. Related TKDL candidates

Plant	Relationship	Similarity*	TKDL evidence
Melia azedarach Linn.	Same genus-level cluster / Meliaceae	HIGH 0.85	Index + direct examination/formulation evidence
Melia dubia Cav. Syn.	Same genus-level cluster / Meliaceae	HIGH 0.80	Index; no direct matching formulation located
Cipadessa baccifera	Same family / Meliaceae	MEDIUM 0.65	Index; matching formulation not established
Aglaia elaeagnoidea Benth. Syn. A. roxburghiana Miq.	Same family / Meliaceae	MEDIUM 0.60	Index; matching formulation not established
Chukrassia tabularis A. Juss.	Same family / Meliaceae	MEDIUM 0.60	Index; matching formulation not established
Cedrela toona Roxb.	Same family / Meliaceae	MEDIUM 0.60	Index; matching formulation not established
Dysoxylum binectariferum Hook. f.	Same family / Meliaceae	MEDIUM 0.60	Index; matching formulation not established

*Similarity is a prototype ranking score, not scientific equivalence or a legal conclusion.

2. Similarity logic

Rank candidates using: same genus/family; overlap in plant part; overlap in traditional indication; overlap in formulation role; and strength of specific TKDL evidence. Same-genus candidates start higher. Family membership alone is insufficient.

Recommended UI wording: “Potential alternative candidate — requires further botanical, formulation, efficacy and patent/legal verification.” Never say “legally safe” solely from family similarity.

3. TKDL evidence — Neem

1212/DEL/2009: TKDL prior-art material includes Neem for skin-related conditions including acne, eczema, psoriasis, scabies, dermatoses, wounds and alopecia. Nuskha-e-tila (MA2/222) includes Neem leaf with sesame components for alopecia-related use; Brihanamajistadi Kvatha (AK10/639) includes Neem fruit in a multi-ingredient formulation for skin disorders and related conditions. The record reports novelty/inventive-step and Section 3(p) objections; outcome: abandoned.

Official TKDL: https://www.tkdil.res.in/tkdil/langdefault/common/Examinarreport/reports/1212_DEL_2009.asp

1947/MUM/2008: TKDL pre-grant opposition included Neem for anti-inflammatory, oral/dental and related traditional uses. The examiner took cognizance of TKDL references; objections included Sections 3(e), 3(p) and inventive step.

Official TKDL: https://www.tkdil.res.in/tkdil/langdefault/common/Examinarreport/reports/1947_MUM_2008.asp

2645/DEL/2005: Neem appears in TKDL prior-art material concerning traditional use for diabetes mellitus, obesity and related conditions; the record reports Section 3(p) and novelty/inventive-step issues.

Official TKDL: https://www.tkdil.res.in/tkdil/langdefault/common/Examinarreport/reports/2645_DEL_2005.asp

20130017279 / USPTO: Melia azedarach appears in a TKDL-related formulation context for itching, acne, favus/prurigo, ichthyosis, scleritis, otalgia and epistaxis. The examiner rejected claims 1–15 under 35 U.S.C. 103(a) over cited prior art.

4. Model-ready fields

family | anchor_plant | candidate_plant | botanical_name | TKDL_names/synonyms | plant_part | traditional_use | formulation | formulation_role | source_text | TKDL_case_id | official_TKDL_url | similarity_score | similarity_reasons | patent_IP_flag | evidence_level | verification_status

5. Evidence discipline

A TKDL plant-name listing proves only that the plant is represented in that TKDL index. It does not prove equivalent medicinal action, formulation interchangeability, or absence of patent barriers. Those claims require the specific TKDL formulation/use record and a separate patent/legal check.

Official TKDL plant index: <https://www.tkdil.res.in/tkdil/langdefault/common/Utility/Keyword/Plant-Name.asp>
